

SkillSwap AI — Complete Platform Guide

The AI-Powered Peer-to-Peer Campus Skill Exchange & Mentorship SaaS
Written in Simple Words for Students, Mentors & Investors

1. What is SkillSwap AI?

SkillSwap AI is a website and web application where students can teach skills they already know and learn new skills for free using a credit-based system.

Instead of paying expensive money for online courses or bootcamps, students trade their knowledge like currency. For example: A student who knows React can teach a junior student, earn credits, and then use those credits to get a 1-on-1 mentorship session on Artificial Intelligence or Spring Boot.

2. The Core Problem & Simple Solution

The Problem	The SkillSwap AI Solution
• Online bootcamps cost thousands of dollars. • Recorded video courses feel lonely. • Senior student mentors are hard to reach.	• 100% Free peer mentorship using credits. • 1-on-1 live video calls with real students. • AI automatically matches you with the best mentor.

3. How SkillSwap AI Works (Step-by-Step)

- Step 1: Sign Up:** Create a free account using your college email address. You instantly receive 50 free credits in your wallet.
- Step 2: Find a Skill or Roadmap:** Search for a skill (like Java, Python, or Figma Design) or use the AI Roadmap tool to generate a 4-week learning plan.
- Step 3: Book a Session:** Pick a date and time to book a 1-on-1 video mentorship session with a student mentor.
- Step 4: Earn Credits by Teaching:** To get more credits, list skills you are good at and mentor junior students.
- Step 5: Get Verified Certificates:** After finishing a session, receive a digital completion certificate to share on LinkedIn & GitHub.

4. Key Features & AI Capabilities

Feature	What It Does (In Simple Words)
AI Learning Roadmap	Type any skill (e.g. PyTorch), and AI builds a step-by-step 4-week learning curriculum.
AI Mentor Matcher	AI analyzes your profile and recommends top-rated student mentors in your college.
Credit Escrow System	Credits stay locked safely during booking and are transferred only when the session ends.

Session Chat	Direct messaging thread between learner and mentor to prepare before the video call.
Verified Certificates	Cryptographically signed digital certificate with a verification code (`CERT-SKILLSWAP-123`).
Admin Analytics	Admin dashboard to manage users, suspend malicious accounts, and audit transactions.

5. How Real Money & Payouts Work

1. **Buying Credits:** Students who do not want to teach can buy credit packs (e.g., Rs. 599 for 120 credits) using UPI, Google Pay, or Credit Cards via Razorpay. The money goes directly into your bank account.
2. **Mentor Payouts:** Mentors who earn credits by teaching can cash out their credits for real money (e.g., 100 credits = Rs. 500) directly to their UPI ID or bank account.

6. Technology Stack

- **Frontend:** React.js + Tailwind CSS (Modern Glassmorphism Design)
- **Backend:** Spring Boot 3 (Java 17) + JWT Security Filters
- **Database:** MySQL 8.0 & H2 Database Engine
- **AI Integration:** OpenAI API (with offline simulation engine)
- **Payments:** Razorpay Payment Gateway API

7. Sample Demo Accounts

Role	Email	Password	Initial Credits
Student / Mentor	alex.chen@stanford.edu	Password123!	120 Credits
AI Specialist	priya.sharma@mit.edu	Password123!	190 Credits
Platform Admin	admin@skillswap.ai	Password123!	500 Credits
